Plants for Wild Life Feeding

JOHN W. HERSHEY
NUT TREE NURSERIES
DOWNINGTOWN, PA.

Supplement To Regular Nut Tree Price List.

This is one of the most complete lists of nursery stock for wild life ever offered. Additions will be made as more species become available. Any criticism of it will be greatly appreciated. Also note the ornamental effect of this list for farm and landscape plantings.

A game program without permanent feeding is futile. Adequate plantings of woody food-bearing plants is the solution.

Criticism of game management either state or Federal is childish. Pitch in and help them by setting an example to the public by planting your own lands and sponsoring club plantings, thereby being the pace-maker for lawmakers and backer-ups of game commissions.

This stock is limited and so's game without food. How many can you use? All stock cut back and wax dipped to insure the highest possible survival. Prices F. O. B. Downingtown.
